

Remote Telecommunications Hub with large TV screen videoconferencing, desktop computers, printers and scanners, local network storage and strong external Wi-Fi long range access points for handheld and portable devices.  
Solar powered with large lithium-ion batteries.

**TelePod** is designed and manufactured in Australia by Yawuru Technology Group Pty Ltd

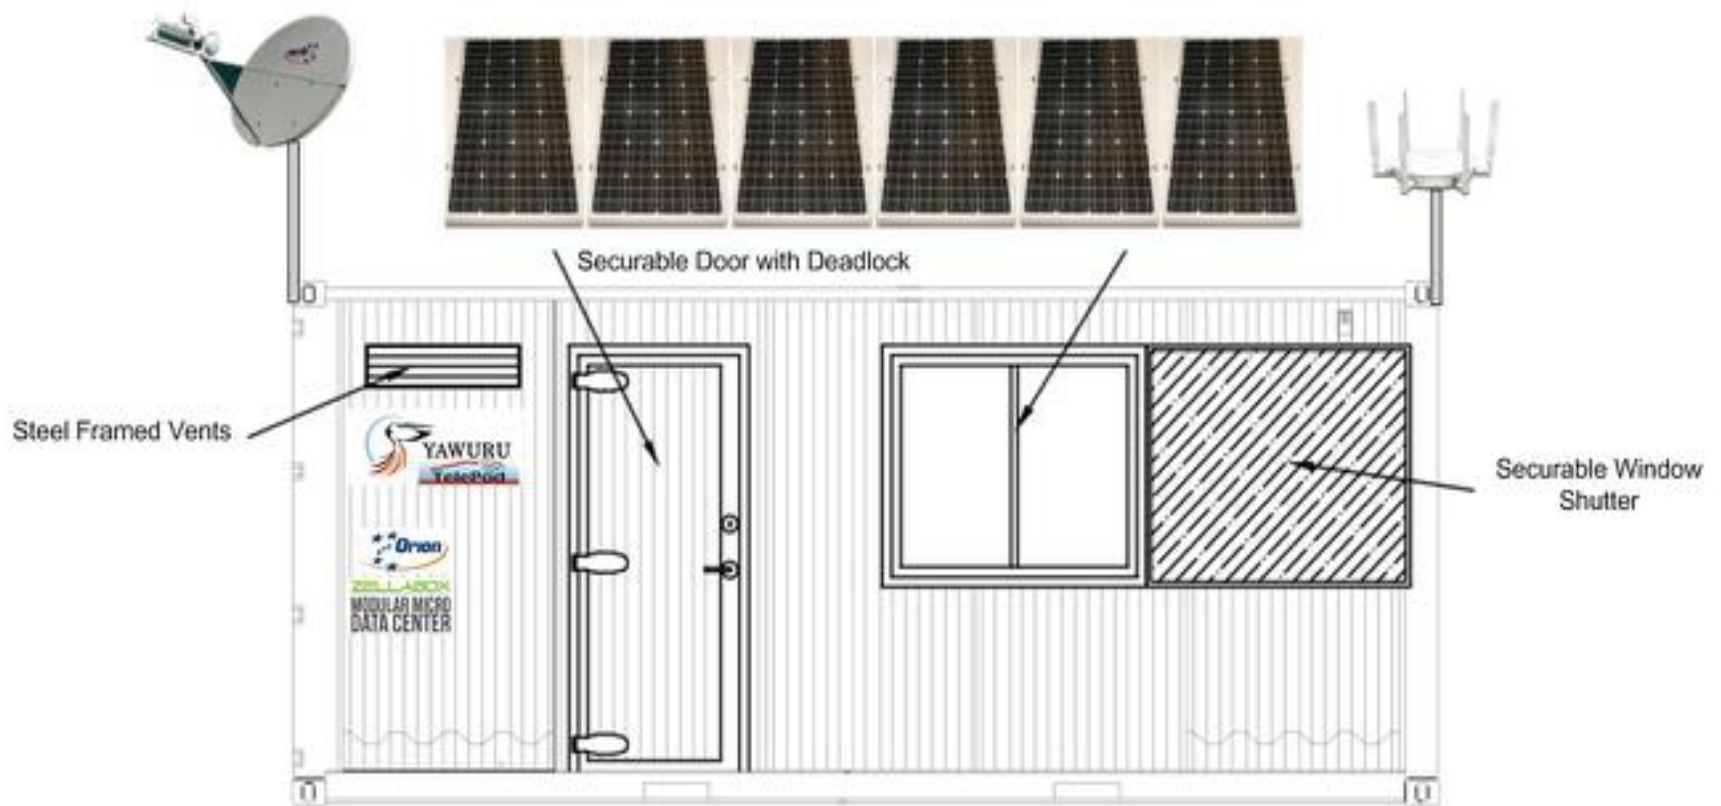

TelePod comes as a complete Telecommunications office, pre-fabricated in a 10' or a 20' ocean container with options for larger or smaller sizes to suit the community, ready for transport and deployment in remote locations.

- \* Solar powered with lithium-ion batteries
- \* Optional connector for generator backup.
- \* Large screen smart TV with videoconference unit.
- \* Desktop computers, printers and scanners.
- \* Internal and strong external Long Range Wi-Fi.

Complete Telecommunications office in a 20' ocean container

Complete Telecommunications  
Mini Hub for very small sites

A small outdoor box with batteries and equipment will serve a remote community very well. When in range of the WiFi transmitter you can have Internet and use mobile phones with “Voice over WiFi” enabled, without need for a 3/4G mobile phone tower.

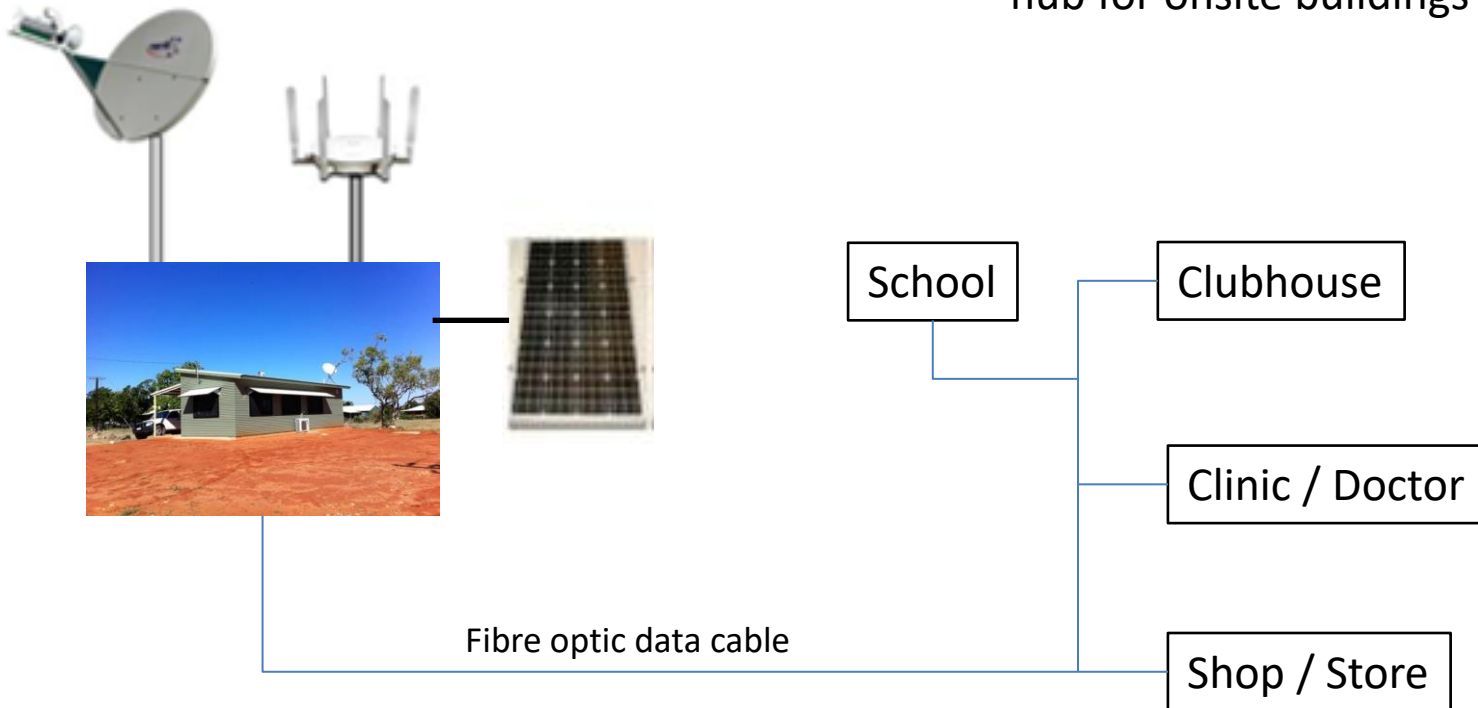

Complete Telecommunications  
hub for onsite buildings

All equipment comes in a prefabricated and pre-wired indoor “Zellabox” rack, ready for connection. Would suit schools, Internet café, club houses and the likes.

Complete Telecommunications hub for onsite buildings

For larger projects all equipment comes in a prefabricated and pre-wired indoor rack, ready for connection. Run a fibre-optic data cable to connect all buildings.

Complete Telecommunications  
Hub for remote communities.
